To The Reader

In response to the globalization of the insurance business and the need for readily available data on world insurance, the Insurance Information Institute produces a Fact Book for international insurance statistics.

We could not have undertaken this project without help from many organizations that collect international insurance data. We are especially grateful for the generous assistance of Axco Insurance Information Services (www.axcoinfo.com), a London-based insurance information service, and Swiss Re (www.swissre.com), which publishes the international research journal, sigma. The information included, which covers some 90 countries, comes from a variety of other sources as well. We have attempted to standardize the information as much as possible.

We hope you find this Fact Book useful.

Chapter 1: World Overview

World Overview

WORLD LIFE AND NONLIFE INSURANCE IN 2014

Outside the United States, the insurance industry is divided into life and nonlife, or general insurance, rather than life/health and property/casualty. World insurance premiums rose 3.7 percent in 2014, adjusted for inflation, after stagnating in 2013, according to Swiss Re's latest study of world insurance. Nonlife premiums rose 2.9 percent in 2014, adjusted for inflation, following 2.7 percent growth in 2013. Life insurance premiums grew by 4.3 percent after inflation in 2014, after having fallen 1.8 percent in 2013, adjusted for inflation.

In 2014 life and nonlife insurance premiums (excluding cross-border business) accounted for 6.2 percent of world gross domestic product (GDP). Premiums accounted for 18.9 percent of GDP in Taiwan, the highest share in the Swiss Re study, followed by 14.2 percent in Hong Kong, 14.0 percent in South Africa, 11.3 percent in South Korea and 11.0 percent in the Netherlands. Premiums represented 7.3 percent of GDP in the United States, the 16th highest share in the study.
